Subject: Boatanchors at Dayton

Hi Gang,

I'll be attending Dayton again this year (Friday and Saturday) and will have a nice group of boatanchors for sale at spaces 1946 & 1947. I plan on bringing an RCA AR-88, a BC-1306, National, Hallicrafters, and Heathkit gears, and some assorted BA parts.

As always, you're welcome to stop by and say hello, have a seat, and enjoy the pretzels. :-)

73,

Tony W8HRO

Subject: 2 BC-611 questions

o chassis 'stretch' Have a BC-611B that has had it's top-connect eyelet pullll toward top preventing tight top-fit.

Any cure?

Cud 'B model' be packing later, longer chassis??

o Open sec'y on mic xfrmr. Near-same as fone? Mic xfrmr marked 274 while fone xfrmr says 275. Anyone have a spare mic?

Will try to sparc-weld open w. 800v @ 2 uA. Then comes a ceramic change-out as in BC-611A

Again, a noon Sat. mil-spec round-up this year?

Tnx!

Marty

Hello Everyone,

This web page on radio dials was referenced in a recent newsletter I received. Note the "glowing pointer gimmick" at the very bottom of the document.

I own an "odd" AN/URM-25* I have never seen a publication on a "J" version of the URM-25.

The "J" does not show up in any 310-4's back to 60's. Anyone else out there have a "J" or can give me the NAVY/ARMY or A/FORCE manual number. The unit looks like a "D" Model.

Thanks..Tony Grogan WA4MRR

Hi All, For Sale at Dayton spaces 1943 & 1944:

For Sale:

=20

Harvey Wells station including:

=20

R-9A receiver works but has had some mods =
cosmetically done to it

=20

T-90 transmitters (two of them) - not tested

=20

APS-90 power supply - not tested

=20

Bandmaster Z MATCH - not tested

=20

FS-1 Fixed station speaker works good

=20

No connecting cable for power supply but I do =
have the Cinch Jones connectors

=20

Original manuals for the R-9A & T-90 reprints =
for the other pieces

=20

At Dayton flea market spaces 1943-1944

=20

Equipment in fair to good or better condition =
not beat up or filthy.

=20

Manual reprints available on all pieces also.

=20

All,

Vintage Field Day sponsored by ER magazine will be held on Saturday, June 7 this year. Let's all pitch in to make this a memorable event. If you are unable to set up out in the field yourself, please try to get on the air during the day from home, especially on 20, 15 and 10M. Past events have been great fun, but it's been pretty lonesome out in the weeds from midmorning through the afternoon. Again, let's make this time around one to remember.

I recently obtained the subject radio, which is a transceiver. The radio is channelized (10), but appears to be programmable in some respects. It was manufactured by Scientific Radio Systems Inc., of Rochester NY, around 1984. It was supposedly made for the Navy, but I have no proof of that. It is mostly solid state, but for the drivers and finals. Any information on this radio would be greatly appreciated as I would like to put it on the air. Thanks in advance for any assistance you may have to offer. 73 - Mike

Flea Spaces 2843,44,45 stop and say hello...

Lots of parts going on this ONE WAY TRIP they need to go away!
Running out of room!

How about a nice Shipping Box ... This thing is Max Size for UPS ...
If you put a 75A4 in it ... you could drop it off the Empire State Building

and it would survive! Need \$40 for it.... you will never have to buy another one.

Toob Testers .. 3 Hickok's 533, 534b, 6000 one B&K 707 it needs a bit of work on it.. works sort of...

Swan 250 .. six meter rig with 117-xc supply asking \$175

Heath HP-23-c asking \$70

how about a New in the Box 250TH tube? ... asking \$100

Paco Dip meter with some coils,

need some Oil Caps for that next Amp project? Have about a dozen of them look like never used... 10 Mfd @ 1500 dc need a buck apiece out of them....

Kenwood Mic MC-60

TenTec Century 21 80-10 meter rig asking \$175 works well.

Anyone have a use for an HP-608B vhf Sig Gen? 10-400 Mhz Real Cheap if you can carry it \$15

Nice Home Brew Supply for Heath/Collins/Drake transmitters \$35

EF Johnson Ranger looks like it will work.... asking \$225

Heathkit HotWater 12 ... 80/75 meter rig .. looks clean \$35

Lots of old Meters, Wheatstone Bridge etc....

TS-164/AR 221a Sig Gen 125 Kc- 20 Mhz

Mil Sig Generator I - 130A very nice condition 100-155 Mhz

Parts ... lots of them.... cheap

Lots of "Wooden Radios" ... Zeniths, Philco's etc....

Flea Spaces again 2843,44,45

I actually have the trailer loaded on Wednesday! ...

Groups,

Before I haul the box back to the storage building for another 15 years, does anyone else want any of these 1.75" square 0-1MADC meters? Scale says "Output Volts". No numbers. Near 80% is a narrow green (just noticed a few are yellow but they may have faded) band and a red line near full scale. #6-32 studs on back for connections. With nuts/washers but without mounting screws. Weston Model 1011. Holes for four mounting screws. Front adjust. On most, front cover is removable with eight (very small) screws on back. \$10.00 each, \$8.00 for 5-9. \$7.50 10 or more. Plus shipping.

Disclaimer - all of the Collins and other Korean War vintage sets that used this size meter (so far as I know) had different full scale readings, so shunts/multipliers/rectifiers would have to be added. I haven't measured the resistance nor have I opened any up to see whether they are already shunted to 1MA (i.e., actually more sensitive movements than 1MA).

Aftre a period of some years I'm trying to get a Ranger 1 running. The rig is new to me.

Question #1. The tuning up step 3a is to get 2.5 ma on the meter (set to "grid") by adjusting the drive and buffer tuning. This rig's meter sits at zero at all adjustments. That's with the Crystal-VFO knob at "VFO", if it's switched to "Zero" things seem normal, the drive and buffer tuning

adjustments work like the manual says they should. Any ideas on where to start?

Question #2. Is there an "easy way" of getting inside the VFO chassis? It looks like the side nearest the 5R4 should be removable.

Thanks,
Mike VE7MMH

Hi all,

I have some Heathkit gear I would like to sell. These are project radios, I have put some effort in to them, but they still need some TLC, and it doesn't like I will have the time anytime soon to devote to them.

HW-16 Novice transceiver. Fair condition, chassis shows some corrosion. This radio was showing signs of life, but I haven't touched it since 97, and it doesn't like I will get back to it. With W7FG manual copy. \$25.00

Heath SB-10. In good condition, case has a few paint chips and scratches. Has the audio network, but is missing a tube or two. Also missing the audio gain knob from the front panel. Untested, no documentation. \$15.00.

Heath HW-20 Pawnee 2 meter transceiver. Radio is in good cosmetic condition, but is still a major project electrically. When I got it, a portion of the wiring harness had melted, I replaced the melted portion of the wiring, the transmitter is showing some output, but the receiver squeals like a stuck pig. Something around the first converter is being difficult to tame. This radio will need some more work and TLC. With original manual, and W7FG manual copy, with W7FG manual copy for the HW-10 6 meter version. \$30.00 (this is a heavy radio, so plan for at least 30.00 shipping).

Buyer will pay for shipping from Reno, Nevada. First come, first served, except that I will give precedence to someone wishing a local pickup.

Hi Gang:
Does anybody have a PP-4763A/GRC power supply manual? Or can somebody loan me one so I can copy ?
Ed

Hello John,

Yes, I bought something from Dave, probably about
5 years ago now that I think about it. I think that this
now is just an out of date web page.

I certainly would not waste a lot of time looking for him
unless you have a good reason.

good luck & 73,
Phil
W5BVB
